

**TOP  
SECRET**

## MISSION: ~~X~~IMPOSSIBLE

*An inter-active program with an emphasis on teamwork, camaraderie, and fun*

### Scenario

A coterie of the *Elite Bureau of Systems And Procedures*, **EBSAP** has been individually selected and collectively summoned to a covert location in North America. They have been arranged into crews and will be trained and equipped to manage and manipulate the massive changes about to take place.

Just as the clandestine conclave is called to order, a messenger delivers a **TOP SECRET** package to the *Executive Director*. The *Executive Director* displays extreme concern as he asks all of the *Directors to come forward*. He hands out the Top Secret packages to the *Directors*. They contain maps, pencils, etc. The *Executive Director* instructs all in attendance to listen to a perilous message from the *Chief*. The tape is inserted into the tape player and, under "intrigue music", the *Chief* says,

*"Good Evening (or Afternoon), Ladies & Gentlemen. It is with much pride that I greet such an elite group of people. However, there is no time to waste as we have a crisis of massive proportions on our hands. I direct your attention to the front of the room where you will all see a computer server with strange blinking lights & ("x") protruding wires. We have received a communiqué from Evil Computer Hackers, demanding an unprecedented sum of money! As if that is not enough, they have given us a deadline of 90 minutes from the end of this message to deliver the funds or they will transfer all of our retirement assets to an offshore account.*

*You have within yourselves possibly the only resource that could be summoned to defeat this evil.... and that is **TEAMWORK**. All of you, working together, could be the way to determine the proper wiring sequence. But, you must act quickly! These evil hackers might be devious, but they are also careless. They have left numerous clues around that, we believe, hold the key to solving the mystery of the computer server's wiring.*

*Your Mission, should you choose to accept it, will be to locate the  wiring disconnect sequence and eliminate the crisis*

*Your **Directors** hold in their hands, maps of the immediate area. The circles on the maps indicate the presence of clues. Do your best to answer the questions and follow the directions to wherever they may lead. Obstacles may stand in the way of acquiring several clues. Execute the encumbrances as quickly as possible and continue on your mission.*

*Hopefully, each team will work separately and, eventually, together in locating the wiring sequence.. When the wiring sequence has been found, only then will we know the proper wires to cut and the proper order. Cutting the wrong wire in the improper order will bring financial disaster to us all!*

*Remember that you'll have 90 minutes from the end of this message. This tape will self-destruct in 5 seconds!"*

When the wiring sequence is located and the group gathers around the "server", each of the *Directors*, in turn, will snip their wire.

When defusing has been achieved a voice declares, "Transfer has been terminated"
